FM Public Dashboard

Description

The FM Public Dashboard facilitating the transfer of information. The task of the module is to display graphics on screens installed in public areas of the building i.a. lobby, reception and lifts. These graphics are designed under the individual requirements of the client. They present real information from building automation. The information displayed on the panels is:

- current weather conditions at a location or elsewhere in the world,
- stock quotes,
- current exchange rates,
- green facts which increase the environmental awareness by presenting the current energy state of the building along with the description,
- presentation of energy statistics,
- display of conference room occupancy information (FM Conference Room Module),
- event information.

The information contained in the visualization is presented in a simple and clear way. User can easily introduce, edit information, and change the display schedule.
